

RENEWABLE ENERGY

Bright Ideas

With continued advances in technology and favorable changes in public policy, opportunities for success in the world of renewable energy have never been greater. Barnes & Thornburg brings sound advice and creative solutions that help a growing and diversified group of clients capitalize on new opportunities and prepare for the future.

As green energy technologies evolve, our Renewable Energy Practice Group applies a think tank approach drawing from experienced attorneys with interdisciplinary skills, to help clients commercialize technology, structure & finance projects, clear regulatory hurdles and serve new customers.

The firm's renewable/alternative energy clients include energy suppliers (solar, wind and biofuels), project developers, investors, lenders, utility purchasers of power, land owners, equipment manufacturers, governmental entities, independent generators and distribution companies.

Our full-range of services include:

- Enterprise & Venture Structuring
- Project Finance & Tax Issues
- Mergers & Acquisitions
- Energy Supply
- Patent Procurement & Protection
- Equipment Procurement
- Real Estate/Project Siting/Construction
- Legislative & Regulatory Advocacy (federal, state and local)

Why Barnes & Thornburg?

Finding new ways to help clients identify solutions and new business opportunities, across industries, is at our core. We are, at times, more than lawyers, we are advisers bringing new ideas to light. We understand what keeps you up at night and work collaboratively to find practical and creative solutions, at the heart of business.
