COMMERCIAL GENERAL LIABILITY

Sophisticated Approach

Clients turn to us for guidance with their sophisticated insurance needs related to bet-the-company lawsuits and catastrophic losses. We have assisted Fortune 500 companies, private businesses, and high net worth individuals who face third-party liabilities for bodily injury, property damage or other torts or civil claims with coverage under their commercial general liability (CGL) policies.

Our team is experienced in helping policyholders navigate CGL insurance coverage to pay for lawsuit defense and settlement costs. We have experience obtaining a defense, convincing carriers to provide independent counsel at reasonable hourly rates, and litigating on behalf of policyholders and insureds when insurance carriers force litigation.

We work with clients to uncover the details of their CGL policies, which are often peppered with exclusions and definitions that carriers say undercut coverage and limit the types of injury and damage that are applicable. Our experience includes getting to the heart of coverage under CGL and umbrella policies, including bodily injury, property damage, and advertising injury.

Our attorneys also have provided advice and represented clients in resolving disputes in a variety of CGL insurance coverage matters related to alleged asbestos-related bodily injury claims, environmental liabilities, major property damage, and alleged personal injuries, among others.
