

OSHA'S Revised Hazard Communications Standard Imposes New Training Requirements By Dec. 1, 2013

June 18, 2013 | [Traditional Labor, Currents - Employment Law](#)

Mark S. Kittaka
Partner

OSHA's revised [Hazard Communication Standard](#) (HCS) requires sweeping mandatory training for most employers across the country on the new requirements for chemical labeling as well as the new Safety Data Sheets by Dec. 1, 2013. It was revised to align it with the internationally accepted Globally Harmonized System of Classification and Labeling of Chemicals (GHS). Any employer that uses hazardous chemicals in its workplace is subject to the communication and training requirements of the HCS. OSHA estimates that this revised standard will affect more than 5 million workplaces across the country employing more than 43 million workers.
