Life Sciences Lunch Series Innovation In The Time Of COVID-19

DATE

August 27, 2020
11 a.m.-Noon (Eastern)

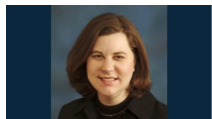

SPEAKERS

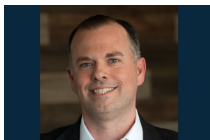

Eric E. Williams,
Pharm.D.
Partner

Deborah
Pollack-Milgate
Partner

Kristin Jones
President and
CEO
Indiana Health
Industry Forum

Tony Tetrault
High-Value Care
Director
hc1

Tom Ryder
President and
CEO
Genesis Plastics
Welding

According to a recent report from BIO, Indiana ended 2019 with strong new patent numbers in the life sciences, but since COVID hit, are there signs that we might be able to keep that streak going? The world turned upside down over the past few months. For some, the pause provided time for thought and the chance to focus on new product development; for others, COVID-19 presented an opportunity to rise to the occasion and innovate new technologies, tools, and treatments to help tackle the pandemic.

Bringing new technology forward is never easy but there are some that are doing it well, even in extreme circumstances. Please join us for a session examining Indiana's innovation landscape in the time of COVID.
