The FMLA and ADA can drive you crazy. "Chronic" conditions, intermittent leaves, last-minute absences, Monday/Friday leave abuse, 8 hour/40 hour restrictions, leaving the job to avoid overtime, using leave time for other reasons, incomplete or vague certifications; it's enough to make you throw up your hands in frustration. And if that's not enough, there's the ADA to deal with, too. Is there anything you can do about it?

You bet. That's what this seminar is all about. It's a half day of strategies you can implement from the first time you suspect someone needs FMLA or ADA leave until the day an employee leaves your employment. There are many "trap doors" for employers, but there's a lot you can do if you know what you're doing.

We'll go step-by-step through the entire FMLA and ADA process and provide candid strategies for how you can stay out of trouble and protect your company.

Who should attend?

- Human resources professionals, whether "rookies" who are just learning about the FMLA or long-time professionals who want new strategies to solve pressing issues
- In-house counsel
- Leave administrators

Just a few of the many topics we'll cover:

- First steps: What you must do at each step of the process
- Is it REALLY my obligation to identify FMLA/ADA issues?
- The difference between incomplete and vague certifications
- Suspected leave abusers: What to do with those you believe are games-players?
- The employment handbook/policy language you need for maximum protection
