The virtual conference, hosted by Cybersecurity Docket, is the only one of its kind that focuses solely on the field of incident response and ransomware attacks. Each session is geared specifically for the legal and compliance professionals who are critical players in the aftermath of ransomware attacks.

The conference's faculty – including Barnes & Thornburg's Scott Godes, along with senior government cybersecurity officials and nearly two dozen other legal and consulting luminaries in the field of ransomware response – will discuss the most important issues now facing attorneys and professionals who work in this area. Please join Scott for a panel discussing insurance for ransomware:
