We can advise you on the federal, state and local laws pertaining to procurement and publicly funded projects, and we are committed to supporting, preserving and expanding commercial relationships at all levels of government.

Our team can provide you with advice regarding virtually every aspect of government contracting, procurement and the security-related issues and we are often called upon to identify initial requirements and funding, as well as to identify and develop contracting vehicles that allow our clients the opportunity to fulfill the governments' needs. We understand a multitude of contracting vehicles, including General Services Administration schedule contracts, broad agency announcements, indefinite delivery and quantity contracts, and other transaction agreements, as well as fixed-price and cost-type agreements.

We will work closely with your team to review, design, implement and improve compliance programs and procedures to minimize potential problems. We can also assist with solicitation reviews and proposal preparation. Once the contract is awarded, we will partner with you to execute subcontracts, advise on matters of contract administration and, when necessary, resolve contract disputes and litigation claims. We can also conduct internal and external audits, resolve cost issues, advise on bid and proposal analysis and preparation, and pursue (or defend) bid protests.
