

Life Sciences Lunch – Industrial Biotechnology: Food, Fuel And Funding

DATE

February 17, 2015

Beyond its role in advancing health and medicine, biotechnology applied to industrial applications is changing the future of the planet. Whether through the development of renewable biofuels and specialty chemicals or the production of micronutrients, proteins, and oils in algae, industrial biotechnology is being successfully applied to a myriad of applications. Please join us as we learn more about the role of industrial biotechnology, how companies here are contributing to one of the most rapidly growing research areas, and how investors are looking at the sector's potential.

Speakers:

- Dr. Joshua Heyen, Founder, Xylogenics, Inc.
- Mike Neibler, VP Business Development, Algaeon, Inc.
