CYBERSECURITY AND DATA PRIVACY RISKS

Sophisticated Approach

Barnes & Thornburg attorneys are experienced advocates when it comes to insurance coverage for cyber risks and privacy events. Having focused on the issue as early as 2008, our attorneys have significant experience helping clients obtain millions of dollars of insurance coverage for losses related to cyberattacks and cyber fraud.

We have guided clients through notable and successful litigation, successful mediations, and strategic counseling that has resulted in coverage under cyberinsurance, crime, errors and omissions, first-party property, kidnap, ransom and extortion, and general liability policies for cyberattack-related losses.

Our attorneys litigated two of the earliest disputes under cyberinsurance policies in state and federal court, both of which resulted in successful settlements.

Many cyberattacks giving rise to the losses with which our team has been involved have been in the national news, and coverage disputes have been featured countless times in insurance industry stories and publications.

In addition to helping clients get the most coverage at the time of a claim, our attorneys also provide strategic advice about offered policy terms and conditions, helping clients obtain the best possible commercially available coverage.
