

Life Sciences Lunch: The Best Ideas Start On Napkins: Medical Product Development Pathways, Pitfalls Predictions

DATE

October 17, 2017

There's not much time from the AHA! moment to a pencil and scratch pad, but from there, the process of bringing a medical device to market can take a lot of twists and turns. Whether making decisions on design elements, quality systems, finding suppliers, or actually manufacturing an approved piece of medical equipment, CEOs need expert guidance and supportive teams. Please join us as we hear from a panel that includes experts in product design, development, and precision manufacturing.
